

MODEL e300

Label Applicator

- Rugged, Modular, Simple
- Variable speed up to 1,000" per minute
- Up to 5" wide label
- PLC Controls with touchscreen display
- Ambidextrous design for added flexibility
- Choice of Wipe-on or Tamp Applicator

The Model e300 is part of LSI's line of economy labeling solutions with a variable speed motor that achieves speeds up to 1,000 inches of label web per minute. The modular, simple, user friendly design sets this applicator above the competition. Available as a wipe-on or tamp applicator, it's ideal for the application of a wide assortment of sizes and shapes of pressure sensitive labels to the top, bottom or side of a product.

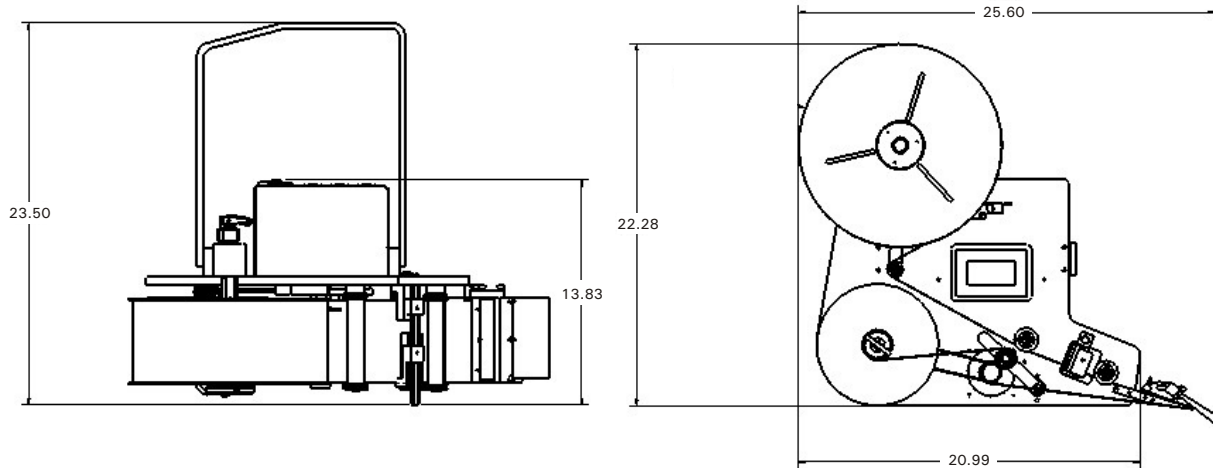

While economical, the e300 is a rugged industrial-duty applicator. The anodized aluminum construction provides protection from corrosive environments. With the ambidextrous left-hand and right-hand design, added flexibility is obtained and allows for changeover in the field. The simplistic design results in minimal downtime, easy fault diagnosis as well as minimal parts inventory.

A brightly lit, touch-screen display offers complete, easy user interface. A change in background color from green to orange to red gives quick, highly visible applicator status. An optional kit provides for moving the interface from the face plate to a location away from the applicator.
