Integrated Software and Printing Systems

TAGMaster® 1006n

## Tagmaster TM-1006n Automatic Tagger

The TM-1006n Tagger is a stand-alone office/desktop system designed to print and cut various tags and/or labels in multiple sizes from blank or preprinted material.

Using the PDF Plus+ software, and your desktop PC, the user can select a PDF tag or label file and print one tag at a time or a large batch, depending on the amount of items needed.

When used together with a Windows® based design application like MS Word®, Adobe®, or others, the Tagmaster 1006n can act as a complete "design, print and cut" system.

* Optional stacker shown, sold separately.

Why YOU would choose the TM-1006n

Quick Changes
You'll get the flexibility you want and need to make changes on the fly. If you happen to be in a situation where you or your customer's tags or labels need government approval, the Tagmaster 1006n system allows you to print and email a copy of the proof directly to your Government agency and print minutes after you receive the approval.

Reduced tag cost
By producing tags at the line, on demand, without any additional labor. Printing only what you need eliminates the scrap and wasted overruns.
