

## **BARTENDER SOFTWARE**

### **BARCODE SOFTWARE, LABEL PRINTING AND MUCH MUCH MORE!**

Create, automate and manage labels, barcodes, RFID tags and more. Comprehensive Labeling Software for Businesses of all sizes. Bartender Improves safety, security, efficiency, and Compliance. With over 30 years of experience, BarTender is globally trusted to optimize our customers' labeling and printing processes.

#### **CREATE**

Design and print almost anything, including packing slips and pallet labels. Easily enter print-time information with customizable data-entry forms. Consolidate designs with Intelligent Templates™.

#### **AUTOMATE**

Print from any operating system, device or web browser. Create sophisticated applications and print automatically from web services requests, data transactions, SDK requests and more.

#### **MANAGE**

Centrally control and secure your entire labeling system. Monitor print status in real time and view detailed history of system usage. Easily integrate with SAP and Oracle.

### **Software that grows with your business**

BarTender allows you to easily upgrade your system as your business grows, without the extra cost and complexity of add-on products.

Bartender allows you to accelerate the speed of goods moving through your supply chain, get the right medication to the right patient at the right time, inform workers how to handle hazardous substances safely, track food-borne illness back to the field where it started, reduce shrinkage on the retail shop floor and maintain regulatory compliance with the world's most comprehensive barcode support.
